BULLOCK, IN SUK C

ART UNIT

PAPER NUMBER

1797

MAIL DATE

DELIVERY MODE

03/04/2010

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/508,983	Applicant(s) BORGMANN ET AL.	
	Examiner IN SUK BULLOCK	Art Unit 1797	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 7-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 7-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 September 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/11/2009 has been entered.

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show references #2 (the figure incorrectly labeled gas/liquid separator as reference #11 instead of correct reference #2) and #17 as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief

Art Unit: 1797

description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Maintained Rejection

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1797

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 7-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 6,303,841 to Senetar et al. (hereinafter "Senetar").

Senetar discloses a process for producing olefins from the effluent of an oxygenate conversion process (col. 1, lines 4-8). The process comprises contacting methanol with a molecular sieve catalyst to produce an effluent stream comprising light olefins, oxygenates, and C4+ hydrocarbons (col. 5, lines 15-30 and col. 7, line 44 to col. 8, line 16). The effluent stream is passed to a compression zone to remove water and methanol, the compressed effluent stream is then sent to an oxygenate removal zone (comprising methanol wash followed by water wash) to removes oxygenates, and the oxygenate removal zone effluent is sent to several separation stages including a drying zone (see Figure 2 and accompanying description in col. 13, line 62 to col. 15, line 10).

Senetar fails to disclose the amount of methanol used in the methanol wash.

Senetar discloses that the oxygenate removal zone comprises the use of conventional water washing and methanol washing steps well known to those skilled in the art. Therefore, it would have been obvious to one skilled in the art at the time the

Art Unit: 1797

invention was made to have determined an effective amount of methanol required for the washing absent any showing of unexpected results.

Senetar, also, fails to disclose the gas superficial velocity as recited in claim 13.

It would have been obvious to one skilled in the art to have determined the optimum gas superficial velocity since it is a result-effective variable. Determination of optimum values of cause effective variables has been held to be within the skill of one practicing in the art. *In re Boesch*, 205 USPQ 215 (CCPA 1980).

With regard to the methanol conversion rate, since the process of Senetar is similar to the claimed process, the process of Senetar would have resulted in the conversion of methanol in the range as claimed.

Response to Arguments

Applicants' arguments filed 11/10/2009 have been fully considered but they are not persuasive.

With regard to Applicants' notation of "removing oxygenates from the olefin stream by the steps consisting essentially of", it should be noted that the claim actually recites "comprising of" and NOT "consisting essentially of". This was noted in the Advisory mailed 11/30/2009.

Applicants argue that "Senetar requires an absorbent step that is excluded from Applicant's claims. The claim has been amended to use the term 'consisting of' in describing the oxygenated removal steps." The argument is not persuasive because the claim recites the transitional phrase "comprising" and not "consisting of " as argued.

Art Unit: 1797

Furthermore, even if the claim was to recite the transitional phrase “consisting of” with regard to removing oxygenates from the olefin stream, the argument would not be persuasive because if one does not desire to remove CO₂ from the olefin stream then the adsorption step may be omitted. It has been held that it would have been obvious to omit a step with the consequent loss of its function if such feature was not desired. *In re Wilson*, 153 USPQ 740.

In view of the foregoing, the claims are obvious over Senetar.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to IN SUK BULLOCK whose telephone number is (571)272-5954. The examiner can normally be reached on Monday - Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 571-272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
